

# IM2/SensorLab Celox BathLevel EMF Licensing Procedure

---

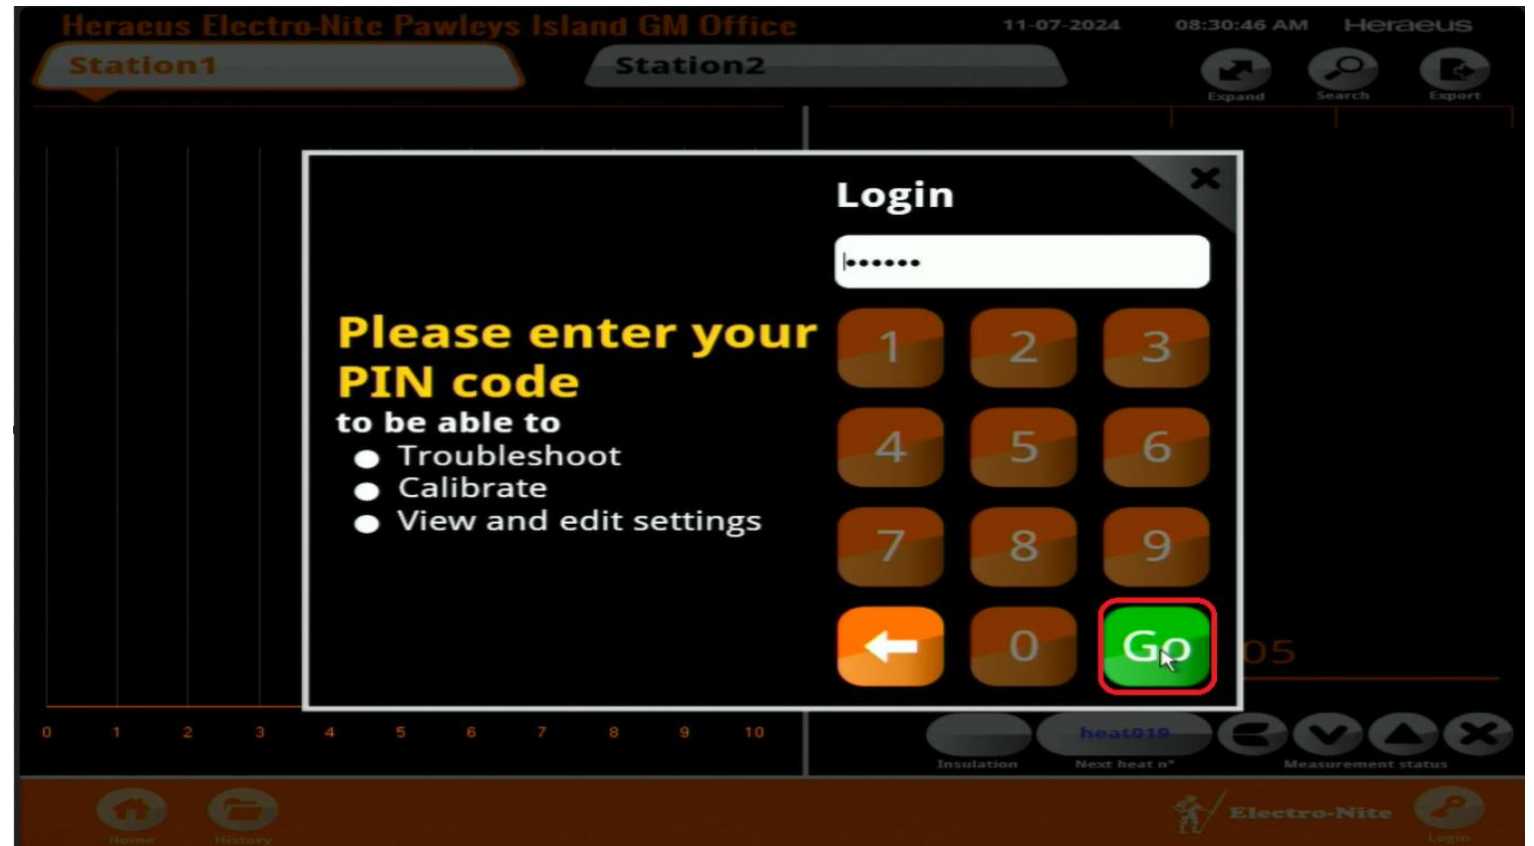

# General licensing description

---

- A license is required for **BathLevel EMF**.
- Requesting a License:
  - The IM2/SensorLab generates a **Hardware ID** file.
  - Email this Hardware ID file to your Heraeus representative.
- Applying the License:
  - Heraeus Electro-Nite will issue a **license code file** to activate BathLevel EMF for that specific SensorLab.
  - Use the license code file to update the BathLevel EMF license (**day password required**).
- The license is **time-limited** (typically 1 year).

# Requesting a License - Log In

- Log in with “24816”.

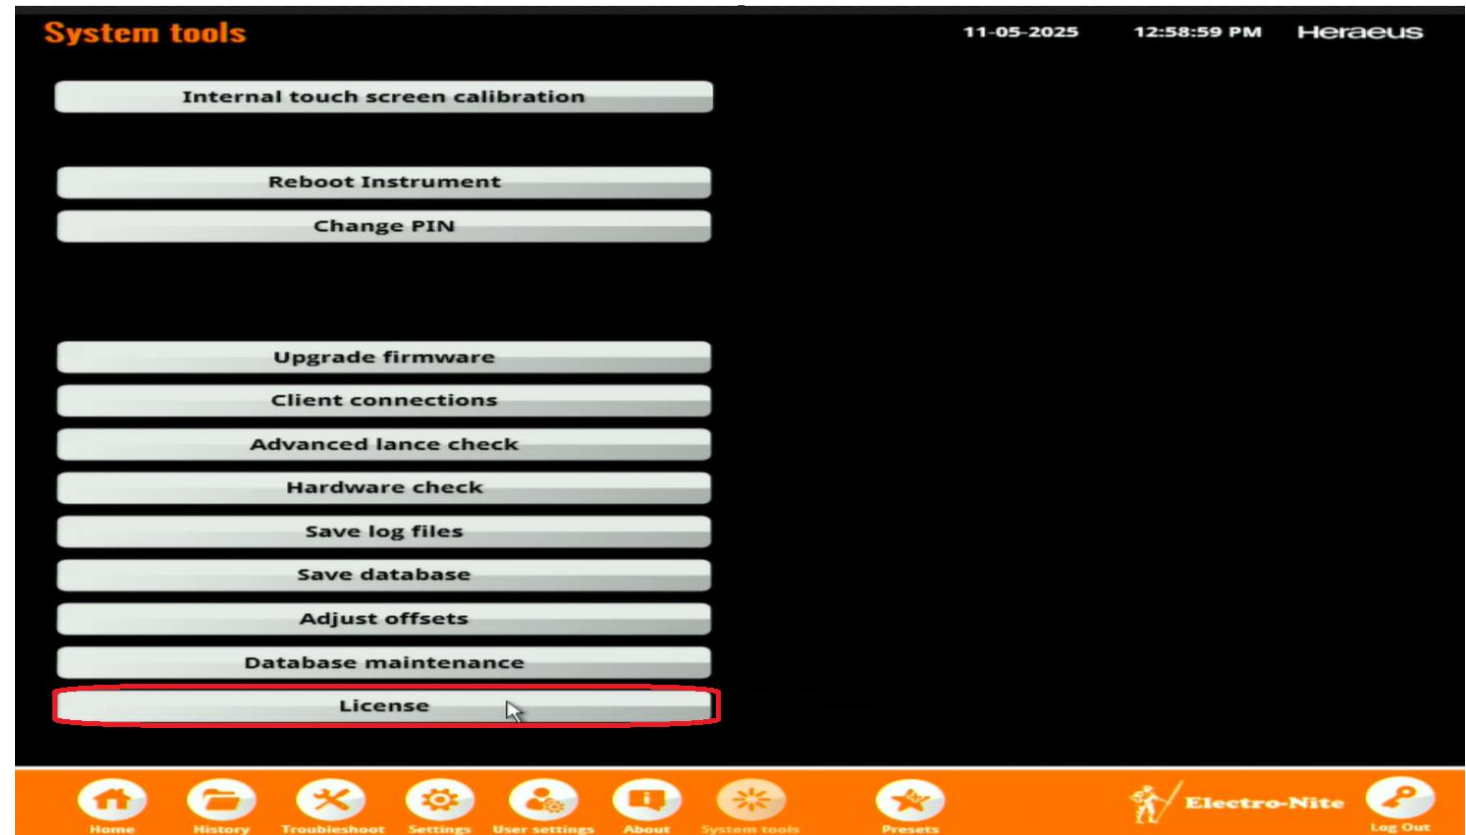

# Requesting a License - System Tools

- Click <System Tools>.

# Requesting a License - Path: System Tools → License

- Click <License>.

# Requesting a License - Copy to File

- Click <Copy to File>.

# Requesting a License - Save Hardware ID File

- Choose a folder on a removable USB drive to save the **Hardware ID** file.
- Saving to the drive's root is fine (as shown).
- Note the name and that the name ends with **.txt** so you can identify it later to email to Heraeus.
- Click <Save>.

# Requesting a License - Emailing the Hardware ID

---

- Email the **Hardware ID** file to your Heraeus representative.

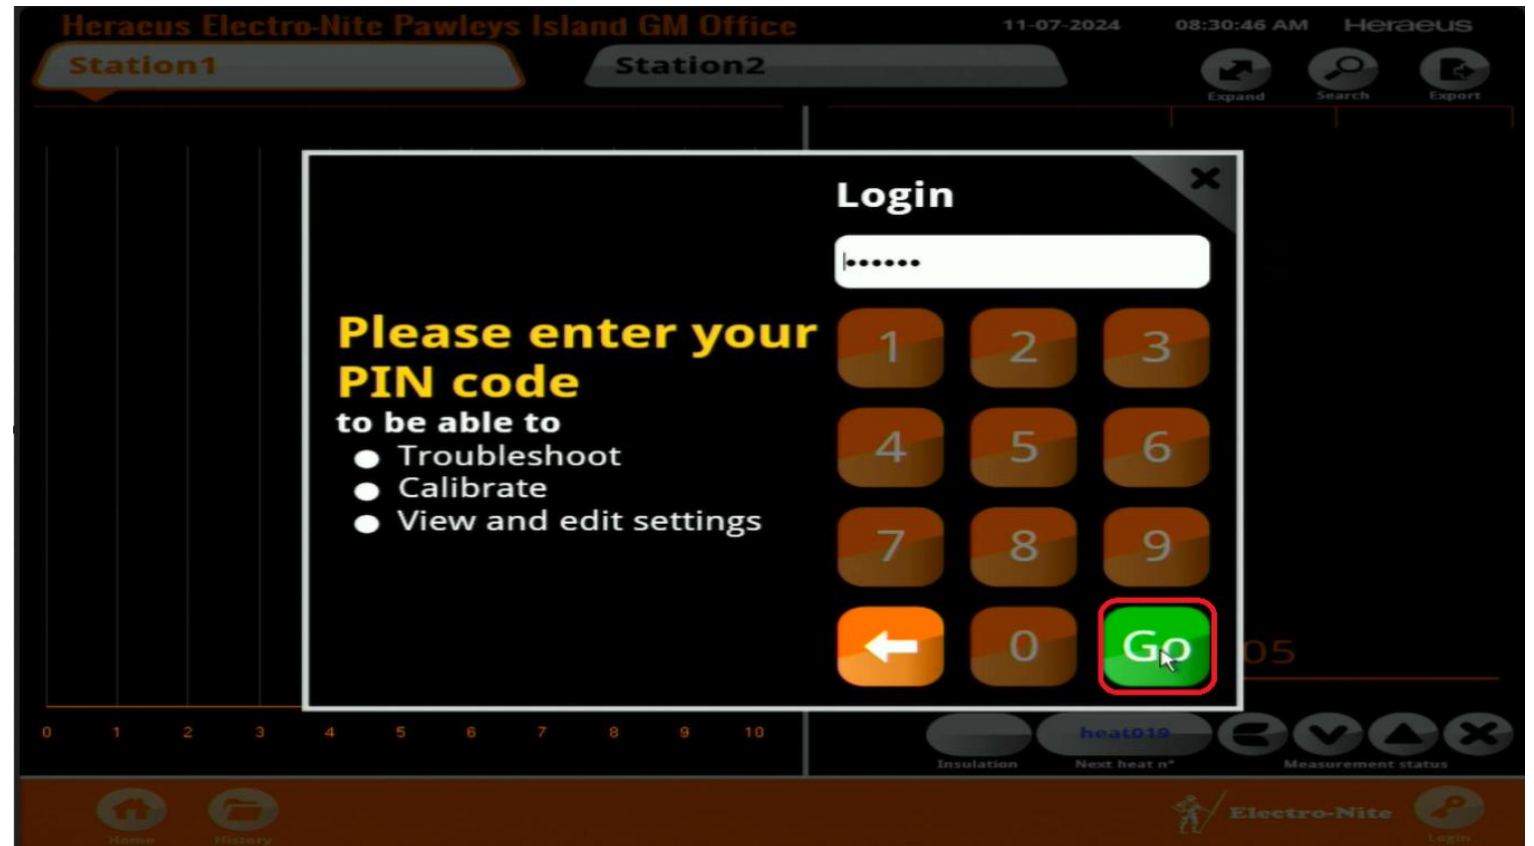

# Applying the License - Prepare USB with Returned License Code

---

- Heraeus Electro-Nite will issue a **license code file** to activate BathLevel EMF for that specific SensorLab and email it back to you.
- Save the **license code file** to a removable USB drive that will be used to make the **license code file** available in the IM2/SensorLab.

# Applying the License - Log In

- Log in with “24816”.

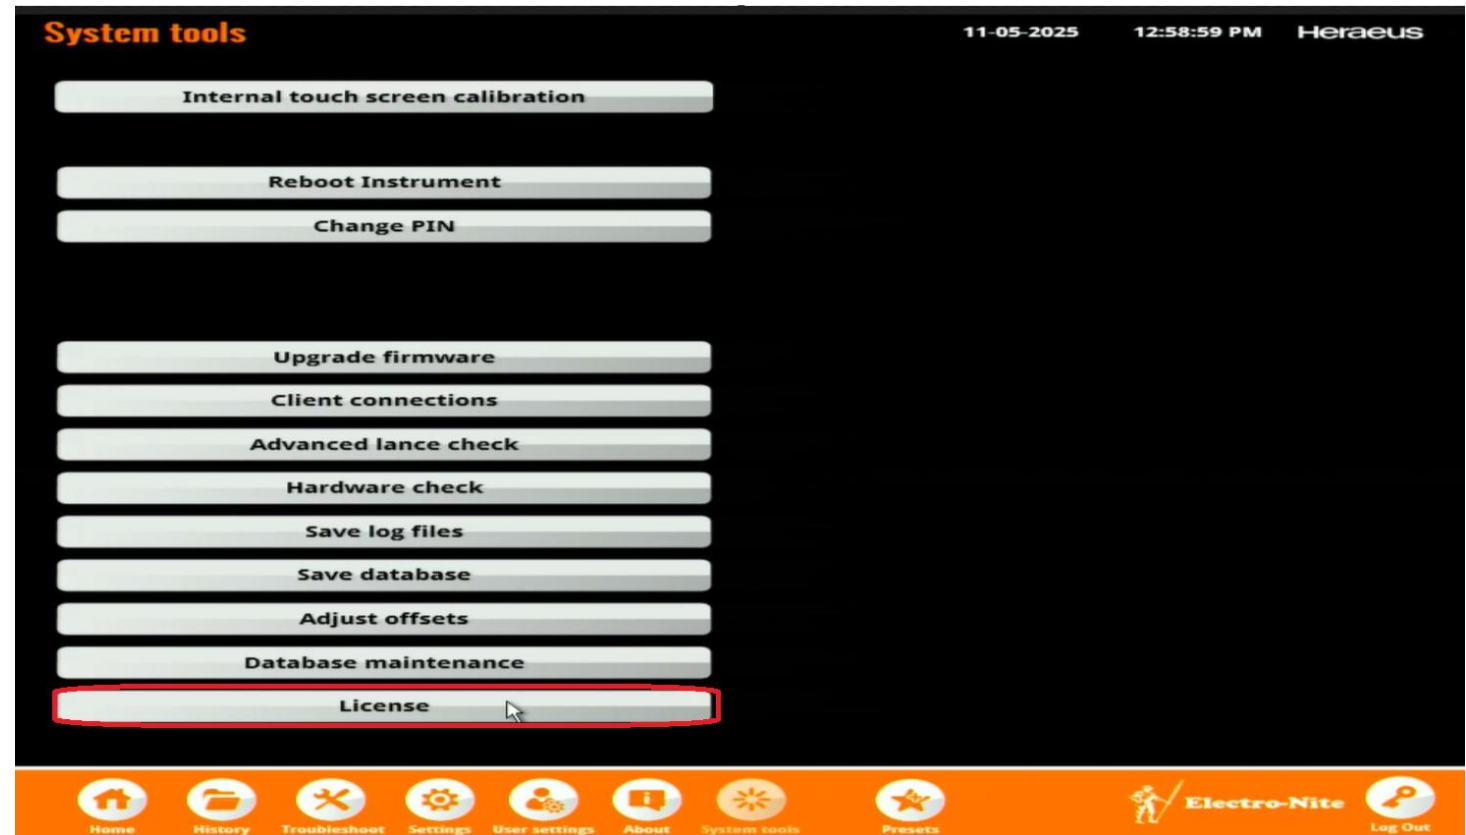

# Applying the License - System Tools

- Click <System Tools>.

# Applying the License - Path: System Tools → License

- Click <License>.

# Applying the License - License

- Plug in the USB drive that contains the **license code file**.
- Click <Update>.
- Browse to the USB drive and select the **license code file**.
- Click <OK>.
- The License screen should show a green check mark and “The license is active.”
